Editorial Features

ANNUAL INDEX OF ARTICLES--1964

	Month & Page No.
Circuits	
AC Voltage Regulator	10-70
Advanced Techniques in Medical Electronics ..... Dr. A.H. Urmer	7-42
A High Efficiency Light Generator ..... William H. Long	2-73
A High Speed Character Generator ..... William R. Sloan	3-174
A High Voltage Equivalent of the Zener Diode ..... Donald O. Ward	10-81
A Look at Light-Sensitive Devices	8-50
An Antenna System for the Entire H-F Band ..... Stephen W. Kershner	8-88
Bisable Multivibrator	1-71
Calculating System Linearity ..... Harold Y. Wong	3-111
Choosing Relays or Solid-State Switching ..... John A. Pfingsten	6-99
Communication Laser	5-32
Computer Features Microelectronics	5-166
Computer Solutions and Rectifier Filter Design ..... W. Austin & K. Angel	12-54
Continuity Tester.....	1-71
Converting Digital Data to Voice ..... John R. Rawley	4-84
Crystal Filter Design Considerations ..... Fred N. Groff	7-58
Cutting System Costs with Integrated Circuits ..... Walt Weyler	9-68
Designing a Simple Microwave Power Density Meter ..... J. Choder, et al	12-90
Designing and Analyzing Voltage Regulators ..... Vernon R. Cunningham	10-78
Designing Bandpass Filters ..... Einer C. Johnson	1-87
Designing Solid State Scanning Circuits ..... John W. Motto, Jr.	9-58
Design of High-Speed Direct-Coupled Amplifiers ..... L.J. Baker & C.L. Wyatt	3-102
Dynamic Noise Generation in Reed Switch Contacts ..... J.J. Vitola & J.P. Breickner	12-66
Electromagnetic Delay Line Progress ..... Stanley S. Packer	7-64
Field Effect Transistors Under Nuclear Radiation ..... Alvin B. Kaufman	3-94
#75 ... Frequency Changes in Octaves ..... D.W. Moffat	12-58
High Resolution CRT's for Precision Display Systems ..... Hilary Moss	4-64
How to Find...the Triggering Point of a Blocking Oscillator	8-91
How to Measure FM Deviation Frequency ..... Robert Leffler	8-148
Improved Monostable Circuit	11-78
Improved Transistor R-F Amplifier Circuit ..... Irving M. Gottlieb	8-83
Integrated Circuits Today and Tomorrow ..... Dr. C. Lester Hogan	6-58
1964 International Solid-State Circuits Conference	2-56
Low-Cost Thin-Film Fabrication	8-55
Matrix Algebra Simplifies Circuit Analysis ..... Azmi S. Audeh	11-67
Measuring Relay Contact-Bounce ..... T. Erickson	6-206
Micro Differential Amplifier with High DC Stability	9-77
Miniaturization and the Interconnection Problem ..... John I. Shue, Jr.	9-40
Minimizing Electron Tube Hum ..... Wayne Austin	6-83
Minimizing Feedback in High-Frequency Transistor Amplifiers ..... C.B. Parker	1-68
Modern Power Supply Design for Computers ..... Daniel R. Hoch	10-38
New Designs in UHF-TV Tuners	1-75
New Developments in Integrated Circuits ..... G.L. Powers & R.J. Widlar	9-73
New Developments in Microcircuit Packaging ..... David E. McElroy	4-57
New Generator Tests Data Handling Systems ..... Larry Mobley	7-108
New Method for Focusing Klystrons ..... Dr. A.J. Prommer	6-152
Noise Behavior in Semiconductor Devices ..... Edwin G. Fonda	4-72
#74 Parallel "T" Filter Chart ..... Robert K. Re	11-71
Protecting Computer Memories Against Power Failures ..... D.M. Bowers & A.E. Conley	1-114
Rating Pre-Amps by "Minimum Detectable Signals" ..... Dr. Koryu Ishii	3-100
Scope Adapter for Tunnel Diode Measurements	4-124

.....

Circuits (Cont'd)	Month & Page No.
#73 SCR Circuit Cuts Cost ..... Louis W. Staalberg	8-85
Semiconductor Technology ..... De. Delbert M. Van Winkle	6-68
Solid State VHF Transmitter Design ..... H.C. Lee, et al	8-96
Solving for Transients in R-C Networks ..... Abraham Goodman	1-72
Some Applications for Neon-Photocell Units ..... Edward Bauman & D. Whateley	7-61
Stabilized Emitter-Follower	10-54
Storage-Card Replacement	8-52
Switching Intermittent Load	4-78
The Enetron--A New Light Source	4-79
The Status of Rectifier-Type Meters ..... L.W. Pignolet	6-192
Thin-Film Capacitors	9-77
Understanding High-Speed Operational Amplifiers ..... Geoffrey Gass	2-106
Unusual Power Supply Applications ..... Paul Birman	10-47
Using Delay Lines in Time Sequential Circuits ..... Hann F. Najjar	11-60
Using the Computer for Integrated Circuit Analysis ..... L.C. Drew & A.G.Atwood	7-52
Where Thin Films are Today ..... Arthur Meehan	9-64
"Worst Case Analysis" in Analog Circuit Design ..... P.A. Milone & F.J. Sposato	3-78
Circuit Wise	
Bisable Multivibrator	1-71
Improved Monostable Circuit	11-78
Switching Intermittent Load	4-78
Components--Chassis Elements	
Achievements and Trends in Transformers ..... Reuben Lee	6-50
Analog Multiplier	7-63
An Appraisal of Cermet Potentiometers ..... S. Schneider	12-59
Applying Modular Design to Receivers ..... Warren W. Gonder	2-76
Capacitors: Today and Tomorrow ..... Rudolf F. Graf	6-20
Choosing Relays or Solid-State Switching ..... John A. Pfingsten	6-99
Connector Contact	5-32
Converting Digital Data to Voice ..... John R. Rawley	4-84
Crystal Filter Design Considerations ..... Fred N. Groff	7-58
Designing Practical Circuit Boards ..... R.A. Navy	5-83
Dynamic Noise Generation in Reed Switch Contacts ..... J.J. Vitola & J.P. Breichner	12-66
Electromagnetic Delay Line Progress ..... Stanley S. Packer	7-64
#72 Equations for Manipulating Tolerances ..... G. Harry Ashbridge	3-83
Field Effect Transistors Under Nuclear Radiation ..... Alvin B. Kaufman	3-94
Guide to Doday's Circuit Interconnections	5-48
High Temperature Wire and Cable ..... David Binch	6-91
Interconnection Device	5-31
Measuring Capacitor Heat Rise ..... Edward Bowling	6-31
Metal Films' Role in Fixed Resistors ..... William E. McLean	6-42
Miniaturization and the Interconnection Problem ..... John I. Shue, Jr.	9-40
New Developments in Interconnection Techniques ..... Warren V. Buster	6-129
New Developments in Microcircuit Packaging ..... David E. McElroy	4-57
Noise Behavior in Semiconductor Devices ..... Edwin G. Fonda	4-72
No Stripping or Soldering	5-164
Scope Adapter for Tunnel Diode Measurements	4-124
The hermetically Sealed Connector and its Capabilities ..... Arthur Stasch	5-72
"Worst Case Analysis" in Analog Circuit Design ..... P.A. Milone & F.J. Sposato	3-78

Computers	Month & Page No.
A High Speed Character Generator ..... William R. Sloan	3-174
Applying Modular Design to Receivers ..... Warren W. Gonder	2-76
Analog/Digital Computer	7-27
Analog Multiplier	7-63
Catalog Printing by Computer	3-91
Computer-Based Message Switching Centers ..... Fred G. Wolff	9-78
Computer Features Microelectronics	5-166
Computer Solutions aid Rectifier Filter Design ..... W. Austin & K. Angel	12-54
Computerized Telegraph System	3-92
Computer Mass Memory System	4-83
Converting Digital Data to Voice ..... John R. Rawley	4-84
Design for a Data Exchange System ..... Robert A. Leonard	5-86
#72 Equations for Manipulating Tolerances ..... G. Harry Ashbridge	3-83
Gemini/Agena Coordinator	9-77
High-Speed Light Pen	1-146
1964 IEEE Convention .....A Glimpse of the Future	3-38
#71 Measuring Phase Stability of Ultrasonic Delay Lines ..... Martin Davidson	2-75
Memory Making Process	1-56
Modern Power Supply Design for Computers ..... Daniel R. Hoch	10-38
Multi-Computer Control System	12-109
New Generator Tests Data Handling Systems ..... Larry Mobley	7-108
Management Control System	12-115
Nondestructive Readout Memories	8-56
Print Reader	2-139
Protecting Computer Memories Against Power Failures ..... D.H. Bowers & A.E. Conley	1-114
Recognizing Patterns with Threaded Cores ..... Dr. Rob Roy	8-86
Semiconductor Networks	2-65
Storage-Card Replacement	8-52
Using Delay Lines in Time Sequential Circuits ..... Hann F. Najjar	11-60
Using the Computer for Integrated Circuit Analysis ..... L.C. Drew & A.G. Atwood	7-52
"Worst Case Analysis" in Analog Circuit Design..... P.A. Milone & F.J. Sposato	3-78

Conventions	
20th Anniversary of National Electronics Conference	10-94
1964 IEEE Convention . . . A Glimpse of the Future	3-38
1964 International Solid-State Circuits Conference	2-56
It's Show Time Again	3-1
1964 NEREM . . . Electronics--Sentry and Servant	10-95
WESCON 1964: Frontiers in Electronics	8-30

Editorials	
Financial Incentives for Engineers	1-1
It's Show Time Again	3-1
Johnson's Record is Promising	2-1
Let's Sell our Capabilities to other Industries	5-1
New Markets and New Jobs in Bio-Medical Electronics	7-1
Service--A Bridge to Electronic Conversion	12-1
The Big Push for New Markets	8-1
The Need for Better Measurements	4-1
To Engineer Better Means to Manage Better	11-1
What's New in Power Supplies!	10-1
Whose Responsibility is Conversion?	9-1

Engineer's Notebook	Month & Page No.
#70 Power Tube Equations ..... Roy A. Henderson	1-77
#71 Measuring Phase Stability of Ultrasonic Delay Lines ..... Martin Davidson	2-75
#72 Equations for Manipulating Tolerances ..... G. Harry Ashbridge	3-83
#73 SCR Circuit Cuts Cost ..... Louis W. Staalberg	8-85
#74 Parallel "T" Filter Chart ..... Robert K. Re	11-71
#75 Frequency Changes in Octaves ..... D.W. Moffat	12-58
General	
Understanding Acoustic Enclosure Systems ..... A. Oppenheim & S. Wasserman	1-78
The Recent Advances in Dry Batteries ..... S.R. Converse	6-145
Optics Technology--New Electronic Discipline	2-79
Moving a Plant Calls for Precise Planning ..... Arthur J. Steele	4-48
Magnetics Research Turns up New Designs, Applications ..... Smedley B. Ruth	2-30
Charting Reliability for Maximum Effectiveness ..... Harold M. Gordy	10-59
An Engineering Approach to Cost Estimating	11-52
Instruments, Measurements, Test Methods	
Advanced Techniques in Medical Electronics ..... Dr. A.H. Urmer	7-42
Continuity Tester	1-71
Coordinate Measurer	1-61
Designing a Simple Microwave Power Density Meter ..... J. Choder, et al	12-90
Design of High-Speed Direct-Coupled Amplifiers ..... D.J. Baker & C.L. Wyatt	3-102
Electromagnetic Compatibility Testing Techniques ..... Wayne A. Taylor	4-80
Electron Microscope TV System	11-73
Establishing a Microwave Calibration Laboratory ..... Pat Tucciarone	11-84
Greater Bandwidth in Direct Reading Scopes	11-72
High Resolution CRT's for Precision Display Systems ..... Hilary Moss	4-64
How to Measure FM Deviation Frequency ..... Robert Leffler	8-148
Laser-Excited Spectrometer	11-130
Making Accurate Microwave Power Measurements ..... Fred R. Pramann	4-126
Making Measurements to Standards Accuracy ..... Loebe Julie	9-134
Measuring Capacitor Heat Rise ..... Edward Bowling	6-31
#71 Measuring Phase Stability of Ultrasonic Delay Lines ..... Martin Davidson	2-75
Measuring Relay Contact-Bounce ..... T. Erickson	6-206
Microwave Spectrum Analyzers ..... Murray H. Feigenbaum	11-102
New Oscilloscopes	3-91
Power-Time Voltage Testing of Transistors ..... John G. Naborowski	5-147
Scope Adapter for Tunnel Diode Measurements	4-124
Simplifying RFI Measurements	4-146
The Need for Better Measurements	4-1
The Status of Rectifier-Type Meters ..... L.W. Pignolet	6-192
Tube Tester	4-31
Understanding High-Speed Operational Amplifiers ..... Geoffrey Gass	2-106
Using the Computer for Integrated Circuit Analysis ..... L.C. Drew & A. Atwood	7-52
What the Designer Should Know About Indicators ..... J. Anderson & J. McElwain	8-77
Markets	
How Promotion Sells Components to Engineers ..... Howard W. Hanson III	11-132
Building an Electronic Capability by 'Acquisitions' ..... E. Ebersol & S. Feldman	3-118
Components: The State-of-the-Mart ..... Sidney Feldman	6-14
Electronic Marketing--Most Needed Breakthrough	6-1

	Month & Page No.
Markets (Cont'd)	
Facsimile is Coming of Age ..... Sidney Feldman	5-38
Financial Incentives for Engineers	1-1
Integrating Electronic Science with the Healing Arts ..... Sidney Feldman	7-28
Let's Sell our Capabilities to Other Industries	5-1
Meeting the Challenge of Leveling Defense Markets ..... Sidney Feldman	10-108
Microcircuits Spur Components Market Reappraisal ..... Sidney Feldman	9-146
MICROELECTRONICS--Where, Why and When?	9-32
Microwave Growth Hinges on Expanding Markets ..... Sidney Feldman	11-116
Moving a Plant Calls for Precise Planning ..... Arthur J. Steele	4-48
New Markets and New Jobs in Bio-Medical Electronics	7-1
One Approach to Foreign Markets--Cross-Licensing! ..... Robert J. Bramlett	2-158
Political Influences on Western Industry ..... Dr. Dean A. Watkins	8-164
Profile of Arizona Electronics	8-169
Review and Forecast for the Electronic Industry	1-25
Reliability Goa,s Depend on New Materials ..... Sidney Feldman	12-100
Service--A Bridge to Electronic Conversion	12-1
The Government Electronics Market ..... Dr. Peter M. Kelly	4-38
The Big Push for New Markets	8-1
The Changing Picture in Western Electronics	8-160
The Pressing Need for Better Marketing Data ..... Sidney Feldman	1-42
WEMA--Focal Point of Western Electronics	8-174
Why Small Electronic Firms Fail!	3-34
Materials	
Achievements and Trends in Transformers ..... Reuben Lee	6-50
A Look at Light-Sensitive Devices	8-50
Analog Multiplier	7-63
Analog Multiplier	7-63
Capacitors: Today and Tomorrow ..... Rudolf F. Graf	6-20
Choosing Photoconductive Cells ..... J.W. Trautwein	10-72
An Appraisal of Cermet Potentiometers ..... S. Schneider	12-59
Cutting System Costs with Integrated Circuits ..... Walt Weyler	9-68
Designing Practical Circuit Boards ..... R.A. Nagy	5-83
Integrated Circuits Today and Tomorrow ..... Dr. C. Lester Hogan	6-58
Low-Cost Thin-Film Fabrication	8-55
Magnetic Alloy	5-31
Magnetics Research Turns up New Designs, Applications ..... Smedley B. Ruth	2-30
Metal Films' Role in Fixed Resistors ..... William E. McLean	6-42
Modulator Crystals for Lasers ..... Laurence A. Murray	2-83
New Developments in Integrated Circuits ..... G. Powers & R. Widlar	9-73
New Developments in Microcircuit Packaging ..... David E. McElroy	4-57
Nondestructive Readout Memories	8-56
No stripping or Soldering	5-164
Semiconductor Technology ..... Dr. Delbert M. Van Winkle	6-68
Silicone Encapsulated Transistors	4-32
Some Applications for Neon-Photocell Units ..... E. Bauman & D. Whateley	7-61
Storage-Card Replacement	8-52
Reliability Goals Depend on New Materials ..... S. Feldman	12-100
Brighter Color TV Screen is Result of New Phosphor	12-57
The Search for New Materials ..... J. Hunter	12-38
Where Thin Films are Today ..... Arthur Meehan	9-64
Wiring Insulation	2-144
1000° Wire and Cable	1-146

	Month & Page No.
Microwave	
Advantages of Storing Data Before Detection ..... John D. Williamson	8-61
A Guide to Future Airborne Radar Antennas ..... R.E. Lawrie & Dr. R.C. Rudduck	11-34
An Antenna System for the Entire H-F Band ..... Stephen W. Kershner	8-88
Battery-Powered X-Ray	2-85
Communication Laser	5-32
Designing a Simple Microwave Power Density Meter ..... J. Choder, et al	12-90
Establishing a Microwave Calibration Laboratory ..... Pat Tucciarone	11-74
1964 IEEE Convention . . . A Glimpse of the Future	3-38
1964 International Solid-State Circuits Conference	2-56
Laser-Excited Spectrometer	11-130
Making Accurate Microwave Power Measurements ..... Fred R. Pramann	4-126
Microwave Growth Hinges on Expanding Markets ..... Sidney Feldman	11-116
Microwave Spectrum Analyzers ..... Murray H. Feigenbaum	11-102
Modulator Crystals for Lasers ..... Laurence A. Murray	2-83
New Method for Focusing Klystrons ..... Dr. A.J. Prommer	6-152
Optics Technology--New Electronic Discipline	2-79
Rating Pre-Amps by "Minimum Detectable Signals" ..... Dr. Koryu Ishii	3-100
Remote Data System	2-67
Self-Tuning HF Transmitter	7-118
Single-Frequency Gas Laser	1-56
Solid State TV Transmitter and Receiver	11-80
The Laser Field . . . Where We Stand Today ..... Theodore H. Maiman	2-68
UHF Transistor	2-67
VHF Telemetry Transmitter	3-92
WESCON 1964: Frontiers in Electronics	8-30
Production Method	
Advances in Controlled Environment Areas ..... L.H. Taylor, et al	12-63
An Appraisal of Cermet Potentiometers ..... S. Schneider	12-59
Applying Modular Design to Receivers ..... Warren W. Gonder	2-76
Camera Speeds Prototype Production of Circuit Masks	11-82
Capacitors: Today and Tomorrow ..... Rudolf F. Graf	6-20
Computer-Controlled Transistor Test Line	9-49
Designing Practical Circuit Boards ..... R.A. Nagy	5-83
Electronic Devices Making Strides in Metalworking ..... Smedley B. Ruth	1-62
Guide to Roady's Circuit Interconnections	5-48
Low-Cost Microelectronics	10-67
Metal Films' Role in Fixed Resistors ..... William E. McLean	6-42
New Designs in Shock and Vibration Protection ..... Roy Butler	6-164
On the Spot Replating	9-152
Radiation-Resistant Transistor	7-116
Silicon Controlled Switches	7-27
Professional Opportunities	
Evaluating and Using Programmed Instruction ..... Gene A. Keluche	7-123
Giving a Talk?--Some Useful Suggestions ..... Francis J. Galvin	1-138
How Promotion Sells Components to Engineers ..... Howard W. Hanson III	11-132
Increasing Role for Women in Electronic ..... Sidney Feldman	2-46
Training Engineers in Cost-Cutting Techniques ..... Lee K. Singer	5-156
Where are Electronic Engineers Going	4-142
Why Small Electronic Firms Fail!	3-34

	Month & Page No.
Semiconductors	
AC-DC SCR Packages	10-77
A Look at Light-Sensitive Devices	8-50
Camera Speeds Prototype Production of Circuit Masks	11-82
Choosing Photoconductive Cells ..... J.W. Trautwein	10-72
Cryogenic Cooling for Space	4-148
Cutting System Costs with Integrated Circuits ..... Walt Weyler	9-68
Designing and Analyzing Voltage Regulators ..... John W. Motto, Jr.	9-58
Field Effect Transistors Under Nuclear Radiation ..... Alvin B. Kaufman	3-94
1964 IEEE Convention . . . A Glimpse of the Future	3-38
Improved Monostable Circuit	11-78
Integrated Circuits Today and Tomorrow ..... Dr. C. Lester Hogan	6-58
1964 International Solid-State Conference	2-56
Low-Cost Microelectronics	10-67
Memory Making Process	1-56
Microcircuits Spur Components Market Reappraisel . . . . . Sidney Feldman	9-146
Micro Differential Amplifier with High DC Stability	9-77
MICROELECTRONICS---Where, Why and When?	9-32
Micro-Transistors	4-31
New Developments in Integrated Circuits ..... G.L. Powers & R.J. Widlar	9-73
Noise Behavior in Semiconductor Devices ..... Edwin G. Fonda	4-72
Power-Time Voltage Testing of Transistors ..... John C. Naborowski	5-147
Radiation-Resistant Transistor	7-116
Recognizing Patterns with Threaded Cores ..... Dr. Rob Roy	8-86
#73 SCR Circuit Cuts Cost ..... Louis W. Staalberg	8-85
Semiconductor Networks	2-65
Semiconductor Technology ..... Dr. Delbert M. Van Winkle	6-68
Silicon Controlled Switches	7-27
Solid State VHF Transmitter Design ..... H.C. Lee, et al	8-96
Some Applications for Neon-Photocell Units ..... E. Bauman & D. Whateley	7-61
Silicone Encapsulated Transistors	4-32
Stabilized Emitter-Follower	10-54
The Search for New Materials ..... J. Hunter	12-38
Thin-Film Capacitors	9-77
UHF Transistor	2-67
Variable Zener	8-157
WESCON 1964: Frontiers in Electronics	8-30
Where Thin Films are Today ..... Arthur Meehan	9-64
Space	
An Antenna System for the Entire H-F Band ,..... Stephen W. Kershner	8-88
Communication Laser	5-32
Cryogenic Cooling for Space	4-148
Gemini/Agena Coordinator	9-77
How to Measure FM Deviation Frequency ..... Robert Leffler	8-148
VHF Telemetry Transmitter	3-92
Systems	
Advanced Techniques in Medical Electronics ..... Dr. A.H. Urmer	7-42
Advantages of Storing Data Before Detection ..... John D. Williamson	8-61
A Guide to Future Airborne Radar Antennas ..... R.E. Lawrie & Dr. R.C. Rudduck	11-34

Month & Page No.

Systems (Cont'd)

A High Efficiency Light Generator ..... William H. Long	2-73
A Look at Light-Sensitive Devices	8-50
A High Speed Character Generator ..... William R. Sloan	3-174
Analog/Digital Computer	7-27
Applying Modular Design to Receivers ..... Warren W. Gonder	2-76
Battery-Powered X-Ray	2-85
Calculating System Linearity ..... Harold Y. Wong	3-111
Catalog Printing by Computer	3-91
Choosing Photoconductive Cells ..... J.W. Trautwein	10-72
Choosing Relays or Solid-State Switching ..... John A. Pfingsten	6-99
Computer-Based Message Switching Centers ..... Fred G. Wolff	9-78
Computer-Controlled Transistor Test Line	9-49
Computer Features Microelectronics	5-166
Computerized Telegraph System	3-92
Computer Mass Memory System	4-83
Converting Digital Data to Voice ..... John R. Rawley	4-84
Cryogenic Cooling for Space	4-148
Crystal Filter Design Considerations ..... Fred N. Gross	7-58
Cutting System Costs with Integrated Circuits ..... Walt Weyler	9-68
Design for a Data Exchange System ..... Robert A. Leonard	6-86
Design of High-Speed Direct-Coupled Amplifiers ..... D.J. Baker & C.L. Wyatt	3-102
Designing and Analyzing Voltage Regulators ..... Vernon R. Cunningham	10-78
Designing Practical Circuit Boards ..... R.A. Navy	5-83
Designing Solid State Scanning Circuits ..... John W. Motto Jr.	9-58
Electromagnetic Compatibility Testing Techniques ..... Wayne A. Taylor	4-80
Electromagnetic Delay Line Progress ..... Stanley S. Packer	7-64
Electronic Devices Making Strides in Metalworking ..... Smedley B. Ruth	1-62
Establishing a Microwave Calibration Laboratory ..... Pat Tucciarone	11-74
Facsimile is Coming of Age ..... Sidney Feldman	5-38
Gemini/Agena Coordinator	9-77
High Resolution CRT's for Precision Display Systems ..... Hilary Moss	4-64
How to Find . . . The Triggering Point of a Blocking Oscillator ..... D.M. Bowers	8-91
How to Measure FM Deviation Frequency ..... Robert Leffler	8-148
How to Specify a Regulated Power Supply	10-53
Improved Transistor R-F Amplifier Circuit ..... Irving M. Gottlieb	8-83
Integrated Circuits Today and Tomorrow ..... Dr. C. Lester Hogan	6-58
Long Distance Xerography	10-70
Low-Cost Microelectronics	10-67
Low-Cost Thin-Film Fabrication	8-55
Making Measurements to Standards Accuracy ..... Loebe Julie	9-134
Management Control System	12-115
Matrix Algebra Simplifies Circuit Analysis ..... Azmi S. Audeh	11-67
Measuring Relay Contact-Bounce ..... T. Erickson	6-206
Microwave Spectrum Analyzers ..... Murray H. Feigenbaum	11-102
Miniature Transmitter Spans Continent	9-49
Miniaturization and the Interconnection Problem ..... John I. Shue, Jr.	9-40
Minimizing Electron Tube Hum ..... Wayne Austin	6-83
Modern Power Supply Design for Computers ..... Daniel R. Hoch	10-38
Modulator Crystals for Lasers ..... Laurence A. Murray	2-83
New Communications System	8-56
New Designs in Shock and Vibration Protection ..... Roy Butler	6-164
Nondestructive Readout Memories	8-56
New Developments in Integrated Circuits ..... G.L. Powers & R.J. Widlar	9-73
New Developments in Interconnection Techniques ..... Warren V. Buster	6-129
New Generator Tests Data Handling Systems ..... Larry Mobley	7-108
New Method for Focusing Klystrons ..... Dr. A.J. Prommer	6-152

Systems (Cont'd)	Month & Page No.
Optics Technology--New Electronic Discipline	2-79
Power-Time Voltage Testing of Transistors ..... John G. Naborowski	5-147
Print Reader	2-139
Rating Pre-Amps by "Minimum Detectable Signals"	3-100
Remote Data System	2-67
Self-Tuning HF Transmitter	7-118
Semiconductor Technology ..... Dr. Delbert M. Van Winkle	6-68
Solid State TV Transmitter and Receiver	11-80
Some Applications for Neon-Photocell Units ..... E. Bauman & D. Whateley	7-61
Solid State VHF Transmitter Design ..... H.C. Lee, et al	8-96
State of the Art of Dynamic Plotting Projection Displays ..... Rolf Andresson	5-78
Storming Warning Equipment	8-55
Teletype Relay System	8-158
The Hermetically Sealed Connector and its Capabilities ..... Arthur Stasch	5-72
Understanding High-Speed Operational Amplifiers ..... Geoffrey Gass	2-106
Unusual Power Supply Applications ..... Paul Birman	10-47
Using Delay Lines in Time Sequential Circuits ..... Hann F. Najjar	11-60
Using the Computer for Integrated Circuit Analysis ..... L.C. Drew & A.G.Atwood	7-52
What the Designer Should Know About Indicators ..... J.H. Anderson & J.D. McElwain	8-77
Where Thin Films are Today ..... Arthur Meehan	9-64
Tubes	
A High Speed Character Generator ..... William R. Sloan	3-174
A High Voltage Equivalent of the Zener Diode ..... Donald O. Ward	10-81
Brighter Color TV Scrum is Result of New Phosphor	12-57
High Resolution CRT's for Precision Display Systems ..... Hilary Moss	4-64
Large Area Color TV Tube	11-80
Minimizing Electron Tube Hum ..... Wayne Austin	6-83
New Method for Focusing Klystrons ..... Dr. A.J. Prommer	6-152
#70 Power Tube Equations ..... Roy A. Henderson	1-77
The Enetron--A New Light Source	4-79
Thyratron Replacement	2-65

WHAT'S NEW

Communications & Antennas

Communication Laser	5-32
Gemini/Agena Coordinator	9-77
Long Distance Xerography	10-70
Miniature Transmitter Spans Continent	9-49
New Communications System	8-56
Remote Data System	2-67
Self-Tuning HF Transmitter	7-118
Solid State TV Transmitter and Receiver	11-80
Storm Warning Equipment	8-55
Teletype Relay System	8-158

	Month & Page No.
Components	
Connector Contact	5-32
Interconnection Device	5-31
No Stripping or Soldering	5-164
1000°F Wire and Cable	1-146
Wiring Insulation	2-144
Computers	
Computer-Controlled Transistor Test Line	9-49
Computer Features Microelectronics	5-166
Computerized Telegraph System	3-92
High-Speed Light Pen	1-146
Memory Making Process	1-56
Multi-Computer Control System	12-109
Non-Destructive Readout Memories	8-56
Printer Header.....	2-139
Storage-Card Replacement	8-52
Management Control System	12-115
General	
Battery-Powered X-Ray	2-85
Brighter Color TV Screen is Result of New Phosphor	12-57
Cryogenic Cooling for Space	4-148
Home TV Recording Gets Closer	12-106
Large Area Color TV Tube	11-80
Magnetic Alloy	5-31
"Multi-Frequency" Transducers	1-59
On the Spot Replating	9-152
Parts Protection	11-130
Small Gear Motors	4-32
Square-Wave Oscillator	9-63
TV Filing System	10-67
Microwave	
Laser-Excited Spectrometer	11-130
Single-Frequency Gas Laser	1-56
VHF Telemetry Transmitter	3-92
Power Supplies	
AC-DC SCR Packages	10-77
AC Voltage Regulator	10-70
Highly Stable Power Supply	10-80

	Month & Page No.
Research & Test Equipment	
Coordinate Measurer	1-61
Electron Microscope TV System	11-73
Greater Bandwidth in Direct Reading Scopes	11-72
New Oscilloscopes	3-91
Simplifying RFI Measurements	4-146
Tube Tester	4-31
Semiconductor & Thin Film	
Analog Multiplier	7-63
Camera Speeds Prototype Production of Circuit Masks	11-82
Low-Cost Microelectronics	10-67
Low-Cost Thin-Film Fabrication	8-55
Micro Differential Amplifier with High DC Stability	9-77
Micro-Transistors	4-31
Radiation-Resistant Transistor	7-116
Semiconductor Networks	2-65
Silicone Encapsulated Transistors	4-32
Silicone Controlled Switches	7-27
Stabilized Emitter-Follower	10-54
Thin-Film Capacitors	9-77
Thyratron Replacement	2-65
UHF Transistor	2-67
Variable Zener	8-157

AUTHORS' INDEX

	Month & Page No.
Anderson, James H.--What the Designer Should Know About Indicators	8-77
Andresson, Rolf--State-of-the-Art of Dynamic Plotting Projection Displays	5-78
Angel, K.--Computer Solutions Aid Rectifier Filter Design	12-84
Ashbridge, G. Harry--#72 Equations for Manipulating Tolerances	3-83
Atwood, Alan G.--Using the Computer for Integrated Circuit Analysis	7-52
Audeh, Azmi S.--Matrix Algebra Simplifies Circuit Analysis	11-67
Austin, W.--Computer Solution and Rectifier Filter Design	12-84
Austin, W.--Minimizing Electron Tube Hum	6-83
Baker, Doran J.--Design of High-Speed Direct-Coupled Amplifiers	3-102
Bauman, Edward--Some Applications for Neon-Photocell Units	7-61
Binch, David--High Temperature Wire and Cable	6-91
Birman, Paul--Unusual Power Supply Applications	10-47
Bowers, Dan M.--How to Find....The Triggering Point of a Blocking Oscillator	8-91
Bowers, Dan M.--Protecting Computer Memories Against Power Failures	1-114
Bowling, Edward--Measuring Capacitor Heat Rise	6-31
Bramlett, Robert J.--One Approach to Foreign Markets--Cross-Licensing!	2-158
Buster, Warren V.--New Developments in Interconnection Techniques	6-129
Butler, Roy--New Designs in Shock and Vibration Protection	6-164
Bowers, Dan M.--Protecting Computer Memories Against Power Failures	1-114
Breickner, J.P.--Dynamic Noise Generation in Reed Switch Contacts	12-66
Choder, J.--Designing a Small Microwave Power Density	12-90
Converse, S.R.--The Recent Advances in Dry Batteries	6-145
Cunningham, Vernon R.--Designing and Analyzing Voltage Regulators	10-78
Detwiler, D.D.--Advances in Controlled Environment Areas	12-63
Davidson, Martin--#71 Measuring Phase Stability of Ultrasonic Delay Lines	2-75
Drew, Laurence C.--Using the Computer for Integrated Circuit Analysis	7-52
Ebersol, Elmer T.--Building an Electronic Capability by 'Acquisitions'	3-118
Erickson, T.--Measuring Relay Contact-Bounce	6-206
Farhat, N.--Designing a Small Microwave Power Density	12-90
Feigenbaum, Murray H.--Microwave Spectrum Analyzers	11-102
Feldman, Sidney--Building an Electronic Capability by 'Acquisitions"	3-118
Feldman, Sidney--Components: The State-of-the-Mart	6-14
Feldman, Sidney--Facsimile is Coming of Age	5-38
Feldman, Sidney--Increasing Role for Women in Electronic	2-46
Feldman, Sidney--Integrating Electronic Science with the Healing Arts	7-28
Feldman, Sidney--Meeting the Challenge of Leveling Defense Markets	10-108
Feldman, Sidney--Microcircuits Spur Components Market Reappraisal	9-146
Feldman, Sidney--Reliability Goals Depend on New Materials	12-59
Feldman, Sidney--Microwave Growth Hinges on Expanding Markets	11-116
Feldman, Sidney--The Pressing Need for Better Marketing Data	1-42
Fonda, Edwin G.--Noise Behavior in Semiconductor Devices	4-72
Galvin, Francis J.--Giving a Talk?--Some Useful Suggestions	1-138
Gass, Geoffrey--Understanding High-Speed Operational Amplifiers	2-106
Gonder, Warren W.--Applying Modular Design to Receivers	2-76
Goodman, Abraham--Solving for Transients in R-C Networks	1-72
Gordy, Harold M.--Charting Reliability for Maximum Effectiveness	10-59
Gottlieb, Irving M.--Improved Transistor R-F Amplifier Circuit	8-83
Graf, Rudolf F.--Capacitors: Today and Tomorrow	6-20
Gross, Fred N.--Crystal Filter Design Considerations	7-58
Hanson, Howard W. III--How Promotion Sells Components to Engineers	11-132
Henderson, Roy A.--#70 Power Tube Equations	1-77
Hoch, Daniel R.--Modern Power Supply Design for Computers	10-38
Hogan, Jr. C. Lester--Integrated Circuits Today and Tomorrow	6-58
